

SocioMee

SocioMee, an online community platform will soon be available in Apple store and playstore

SocioMee is a unique community which aims to make the digital world free from monopoly, corrupt systems, fake content distribution and lack of user control over the platform.

Set to arrive in 2022, SocioMee will offer a unique platform to users all over the globe with an eye out towards a better future in the online world. SocioMee is **free from influence, propaganda, fake profiles and fake content**, and believes in distribution of content exactly what the user wants. We also value **privacy** and **respectful behaviour** online with a handful of tools that ensure that SocioMee stays how it is meant to be, a community for everyone free from division, discrimination and disparity.

"Throughout our online community, users can feel more power in their hands to choose the kind and location of content and suggestions they want to receive! SocioMee believes in a level playing field for all users, where anyone can trend, influence, motivate, advertise, shop and much more. SocioMee also collects user data for better management and experience to users, not for selling them to third-parties or anywhere else. SocioMee wants to **understand user behaviour, not control it**. All content on the platform shall abide by SocioMee's Terms & Conditions, i.e., free from unethical, offensive or violent content through Bad Word Filters, Bad Image Filters and Bad Video Filters. The platform will promote environmental issues like sustainability, promoting environmental awareness and adoption of Green Energy", says Ahmad, co-owner of SocioMee.

SocioMee would be **available for free** to users and businesses globally. The app will be available first in Europe, and then **all over the world** in several languages on the Apple App store and Google Playstore. Phase II of the product is currently under development and would be available soon.

SocioMee and its supporting apps are developed by the SocioMee Group.
